

## Page County Animal Shelter

### Animal Intake Policy

Page County Animal Shelter accepts stray dogs and cats found within Page County and permits owner surrenders from Page County residents when space is available. Upon intake, each animal receives a brief intake examination, performed to the best of staff ability while always prioritizing personal safety. Any medical concerns and identifying descriptions are documented on the intake record. All animals are scanned for microchips upon intake and again during their assessment. Dogs and cats receive their initial vaccinations, deworming, and treatment for external parasites once they are made available for adoption or transfer.
