

## LOUDOUN COMMUNITY CAT COALITION INTAKE POLICY

January 14, 2018

### Animal Intake Policy

All cats that come into the care of the Loudoun Community Cat Coalition come from TNR (Trap, Neuter, Return) programs.

We will do intake on young kittens under the age of twelve weeks that are found in the field during TNR. We will provide needed medical care, age appropriate vaccinations, and spay/neuter. When they are healthy & ready, they will be placed for adoption. There are occasions when the intake of friendly adult cats is required, and we will do intake if needed on a case by case basis.

We will transfer adult community cats, or young kittens if needed, from Loudoun County Animal Services.

Our main goal is population control. Therefore, we only accept owner surrenders in emergency situations.
